

## Experiencing Science

### **IPB exhibition shows photos from 14 years of science outreach at the *Lange Nacht der Wissenschaften***

Once a year, university and science institutes across the city hold an open door event. The popular "*Lange Nacht der Wissenschaften*" outreach is also regularly taking place at the IPB. With posters, talks, guided tours and hands-on experiments, we share our fascination about plant science with visitors of all ages. The best photos of 14 years of outreach nights are currently on display at the IPB foyer and hallways. Here you will find a selection of the exhibits.
