

The Leibniz Research Alliance *Bioactive Compounds and Biotechnology* unifies the broad research competencies of 19 Leibniz Institutes on isolation and production of bioactive agents, their effects and application including biotechnological processes. The Research Alliance is funded by the Leibniz Association.

# Leibniz Drug of the Year

2021

The Leibniz Drug of the Year will be awarded by the Research Alliance *Bioactive Compounds and Biotechnology* to honor important research activities in the field of bioactive agents, i.e.:

- A promising new chemical structure or target
- Special and new aspects or applications of known bioactive agents
- New procedures of (biotechnological) isolation or production of bioactives

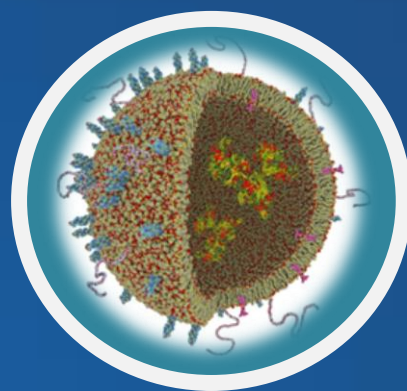

The prize winner(s) will receive a medal, a certificate and 2.000 Euro prize money. The laureate(s) will be invited to the alliance's conference *Wirkstofftage 2021* from 12-13 of April 2021 in Hamburg, Germany to present their work.

**Application deadline: 16 of November 2020**

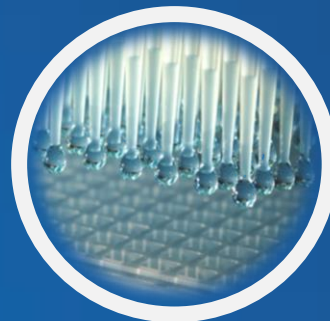

**Contact: [wirkstoffe@ipb-halle.de](mailto:wirkstoffe@ipb-halle.de)**

The research results submitted should not be older than 5 years and can be performed either by one scientist individually or a team of up to 5 persons, who were working at a Leibniz Institute at the time the research was done. Both self applications and suggestions of potential candidates are possible. Please submit a one-page rationale (Arial 11 pt) in English along with a pdf-document of the respective achievement (patent, publication, etc.).

All applicants agree to a publication of their names, photographs and application information. The laureate(s) provide(s) information (e.g. pictures, graphics, text material, etc.) and grants copyright free of charge to the Leibniz Association and the Research Alliance for promotion purposes.

# Research Award of the Leibniz Alliance “Bioactives and Biotechnology”

The Leibniz Research Alliance “Bioactive Compounds and Biotechnology” calls for applications for its 2020 research award. The award honors outstanding scientific personalities active in a research topic covered by the Alliance. A formal connection or cooperation with a member of the Leibniz Association or the Alliance is not required but valued. The prize includes € 2,000 prize money, a Leibniz medal, a certificate, and an invitation to the conference “Leibniz-Wirkstofftage” 12-13. April 2021 in Hamburg, Germany, covering travel expenses.

**Application Deadline: 16. November 2020**

**Contact: [wirkstoffe@ipb-halle.de](mailto:wirkstoffe@ipb-halle.de)**

Nominations can be submitted by any active principal investigator of a Leibniz Institute. They should include – in English language – ca. one page highlighting the merits of the nominee, preferably relating them to an extraordinary achievement that did not receive a prize previously. Full contact details, a CV, and ideally pdfs of key publications or patents should be provided. Self-applications are not possible. The nominee should be asked for consent prior to suggesting her/his name. The laureate is expected to present his/her research on the upcoming “Leibniz-Wirkstofftage” (s. above) and be willing to participate in a press event or similar PR activities.
